## Using Permalinks

Languages: [English](#) • [Français](#) • [Português do Brasil](#) • [Italiano](#) • [日本語](#) • [한국어](#) • [ไทย](#) • [中文\(简体\)](#) • [中文\(繁體\)](#) • [\(Add your language\)](#)

Permalinks are the permanent URLs to your individual weblog posts, as well as categories and other lists of weblog postings. A permalink is what another weblogger will use to link to your article (or section), or how you might send a link to your story in an e-mail message. The URL to each post should be permanent, and never change — hence *permalink*.

### Permalink Types

There are three basic types of WordPress permalinks:

#### mod\_rewrite: "Pretty Permalinks"

Using `mod_rewrite` or `lighttpd` you can produce much nicer permalinks (see [Pretty Permalinks](#)). There are many different formats, but the most common, and most versatile looks like

```
http://example.com/2012/post-name/
```

or
